Bank of Montreal Statement Reveals Strong Liquid Position: Cash Holdings at High Level

OF TOTAL ASSETS OF \$759,108,178, LIQUID ASSETS AMOUNT TO \$491,247,207, EQUAL TO 71.97% OF ALL LIABILITIES TO THE PUBLIC. CASH HOLDINGS ARE UP TO \$87,210,888 FROM \$78,683,217 — EXCESS OF ASSETS OVER LIABILITIES TO PUBLIC AMOUNTS TO \$76,538,810.

The Annual Statement of the Bank of Montreal shows the Bank in its usual strong liquid position. Of total assets of \$759,108,178, quickly available resources are \$491,247,207, equal to 71.97% of all liabilities to the public.

A feature of the liquid assets is afforded by cash holdings of \$87,210,888, up from \$78,683,217 a year ago.

The principal holdings are in government and other bonds and debentures, which now amount to \$317,936,912, as compared with \$311,696,375 at the end of the previous year. The excess of assets over liabilities to the public has increased to \$76,538,810.

The report makes its appearance at a time when it is certain to be studied closely by all who are anxious to get a better understanding of the strong position in which the leading bank has maintained its resources.

Notwithstanding general evidence of more active manufacturing conditions, current loans are slightly down at \$243,477,041 as compared with \$251,885,262 at the end of the previous year. This would indicate that a number of Canadian companies still find it possible to finance business in its present volume without leaning heavily on bank recommendation.

Deposits Well Maintained. Deposits are well maintained, especially in view of recent large government bond offerings. Total deposits payable on demand and after notice are \$630,218,835, compared with \$641,346,000 at the end of the previous year. The increase is due to the showing of total assets of \$759,108,178 which, to meet payment of liabilities to the public of \$682,569,368, leaving an excess of assets over liabilities to the public of \$76,538,810.

Profit and Loss Account. Profits for the year are reported at \$4,105,024, from which are deducted Dominion and Provincial government taxes totaling \$900,654, leaving net profits at \$3,204,369, equal to 4.23% on the combined capital, real and undivided profits. From this amount has been paid \$2,880,000 in dividends to shareholders, as compared with \$3,060,000 in the previous year. A further deduction of \$100,000 as reservation for bank premises, the same a last year, leaves an amount of \$224,369 to be applied to profit and loss account. With the addition, the total at credit of profit and loss carried forward is \$1,809,820, up from \$1,583,451 a year ago.

As has been the practice for the past few years, the Bank has issued the statement for the public in an easily understandable form, with explanatory notes for each of the headings under which the figures are grouped.

The report will be submitted to shareholders at the annual general meeting which will be held at the Head Office of the Bank in Montreal on Monday, December 3rd.

News Notes

The U.F.W.A. had a Sale on Wednesday. Good patronage is reported.

J. B. Merrill of Hill Spring was a Raymond visitor Wednesday of this week.

Mrs. W. M. Scott visited with relatives in Raymond on Sunday forenoon last.

Henry Gibb has had carpenter and plasterer in his house the past week, making an alteration or two for convenience.

Mr. and Mrs. A. L. McMullin are rejoicing over the arrival of their first grandson. He was born at St. Michael's hospital Lethbridge Nov. 23 to Mr. and Mrs. Lynn Bullock of Barnwell.

Graded Poultry Defined

Some provision merchants have been advertising in the newspapers recently "Government Graded Poultry" and "Branded Beef," without stating the grade of these products. Not to state the grade of the poultry or the colour of the brand of the beef is felt to be misleading to the general public. Buyers of products that are graded according to standards set by the Dominion Department of Agriculture should insist on knowing whether the poultry is Grade A, B, or C, and if the beef is red or blue brand. Most of the government inspected and graded poultry is marked with tags that indicate the grade.

Just as there is a wide difference between the several kinds of poultry—chicken, fowl, turkey, ducks and geese—so are there wide differences in quality in each kind. The government grades denote the quality and take the guesswork out of buying on the part of the purchaser, but while poultry for export must be tagged according to grade, and poultry on the domestic market offered for sale on stated government grades must conform to the Canadian Standards, the practice of affixing tags is optional. Consequently, unless all poultry on sale are marked with the grade the represent under government grading, the phrase "Government Graded" does not afford much help to the housewife.

There are two classes of government graded dressed poultry—Milkfed and Selected—and, again, these two classes are divided into grades according to quality, the latter depending almost entirely upon the manner in which the bird has been fed. Milkfed poultry show a white color in the deposits of fat and a fine soft texture in the skin and flesh, the outward evidence of special feeding. There are 3 grades of Milkfed poultry—A, B, and Special. The Selected class which shows yellow colour in the deposits of fat and no evidence of milk-feeding, has four grades, namely A, B, C, and Special. Thus, it can be seen that the declaration of the kind of grade is a matter of considerable importance to the purchaser.

Issued by the Press and public relations Division, Publications Branch, Department of Agriculture, Ottawa, Canada, P. B.

held at the Head Office of the Bank in Montreal on Monday, December 3rd.

Liberals Hold Meeting

A slimly attended Liberal meeting was held in the Town Hall Tuesday evening last, when discussions regarding the interests of Liberalism in the Constituency were carried on.

P. K. Moreland, New Dayton and R. S. Pefferingwell, Milk River were both present representing the Constituency organization and directed the discussions.

Due to the illness of V. J. O'Brien, it was necessary to appoint a Vice-President to carry on, and the choice fell on John Blackmore.

It was decided to conduct the business of both Raymond and the one organization, and the list of voters will be lowered into to determine how many candidates to send to the Nominating Convention, and this will be attended to at a later meeting, being 1 delegate to each 50 voters.

It was also pointed out that the idea was to have the same local organization carry on for both Provincial and Dominion matters, and save any duplication. Young Liberal and a Women's organizations were both suggested as effective means of getting Liberalism before the people, and the committee have this under consideration.

Many questions were asked and answered, and Mr. Pefferingwell stated that he was endeavoring to get W. R. Howson to

address a Liberal meeting here in Raymond, early in December, and would notify as soon as possible.

Questions were asked regarding the Liberal platform, and it was stated it was still in the making. The following definition of Liberalism, however, was read to the meeting to reflect on and think over.

LIBERALISM

"Liberalism is freedom in the process of growth, a growing freedom, varying its expression to meet the needs of time and place. At one time and in one place, it becomes a struggle for greater freedom in matters intellectual and religious; it stands then for toleration and moderation; at another time and in another place it is related to political liberty, and becomes a force making for constitutional freedom in matters of government. Again and elsewhere, it is concerned with the problems of trade and taxation, and becomes the harbinger of financial freedom. In our country, and in our day and generation, it is largely concerned with the problem of living, and becomes the force that is making for economic freedom. Everywhere and at all times it is an expanding freedom."

—Rt. Hon. W. Mackenzie King, Prime Minister of Canada.

News Notes

Ralph Bros. are getting their garage ready for stuccoing now.

Gordon Brewerton, Cardston, was a Raymond visitor on Tuesday last.

Whether you have 5c. or 5.00 to spend for Christmas Cads, we want your business, and can give you BIG value for your money. Come in and see them at The Recorder.

Lou King went to Calgary Tuesday to bring down a new Ford for Dr. Johanson, who is relieving Dr. Leech, here. King Motors made the sale.

Quite a number of people were in town Tuesday afternoon when a court case or two was listened to by Magistrate Low.

A foundation is being put in, on the lot west of Mr. and Mrs. John Landysheff's home. We understand that the Godfrey Holmes farm home will be moved onto this location.

Anything lost, found, strayed, stolen or misplaced, can very likely be found by a wanted. They work night and day. Try one and see.

Call in and look over our selection of Xmas Cards. They are the best, and most reasonably priced, that we have ever shown.

Needless to say, the school kids greatly enjoyed the holiday they had on Thursday in honor of the wedding of the Duke of Kent and Princess Marina. No doubt they wish more of the members of the Royal family would get married.

Unrest in Europe seems to be growing. Internal friction in Germany is given as the cause for cancelling all Christmas leaves and furloughs and postponing the drill home of the 1st, 2nd and 3rd Regiments of the 1st Canadian Trench and the 1st Canadian Trench.

The snow storm Sunday night was of short duration, and only reached to Cardston.

Hey kiddies: Come in and get a load of our 2 for 5c. Xmas Cards. These are just the thing for your small friends.

Quite a lot of beetlases are going out these days to farmers all the way from themountains on the west to middle Saskatchewan on the east.

Charles Appleby went to work on Monday to his work in the United Irrigation District.

Some people say the Recorder is never read. Maybe not, but a mistake or misstatement of fact never gets by without our hearing about it.

Radio inspectors were in town last week if they didn't call on you then, you had better get your license. They are coming back Nuff sed.

The second estimate of wheat production in the Prairie Provinces for 1934 is two million bushels lower than the preliminary estimate of 265 million bushels made on September 11th last.

Cattle hides used by the leather industry in Canada during 1933 weighed 63,867,012 pounds; calf and kip skins, 12,510,117 pounds, and pickled sheep skins, 3,621,303 pounds. The cattle hides were 72 per cent of Canadian origin.

It's not too early to be thinking about your Christmas Greeting Cards. Choose now while the stock is selective. Recorder Personal Christmas Card samples are now ready, and inspection places you under no obligation. Many attractive cards are priced as low as \$1.25 per dozen this season, as cheap as you can buy ordinary blank cards.

Sees Market For Hay and Straw In Parts of States

Wedding Bells

HUTCHINSON — WILCOX

The marriage took place in the Manse at Magrath on Saturday, November 24th, 1934, of Cecil O., son of Mr. and Mrs. E. J. Hutchinson, and Miss Muriel, daughter of Frank Wilcox of Claresholm, in the presence of a few friends and relatives of the bride and groom, the Rev. J. A. Claxton officiating.

Following the ceremony, a wedding reception was held at the groom's parent's home in Raymond, with over 30 guests present, among them being the members of the Hutchinson family, Mr. and Mrs. I. Critoph, the latter a sister of the bride, Bernard, the bride's brother, and Miss Osborn, of Claresholm, and near friend of the bride, together with a number of friends and neighbors. A very enjoyable evening was spent.

The young couple have a host of friends in Raymond, who will all wish them well in their married life, and we join in wishing them success and much happiness. For the present they are making their home in Raymond, their plans for the future being still somewhat indefinite.

U. S. PURCHASING AGENT SAYS DROUGHT STATES NEEDS FODDER

Opportunities for Canadian farmers to dispose of a large volume of hay and straw in the neighboring states of the United States are seen by M. McGregor of Brandon, Man., who is purchasing agent for fodder in Canada for the United States government. In a letter to the Recorder Mr. McGregor says conditions in many parts of the drought areas across the line are exceedingly critical and much feed will be required to carry livestock on the farms of families on relief.

The desire is not to take from Canada feed that is required here but only to absorb surpluses. Mr. McGregor sees a large amount of new money for Western Canada farmers if the proposition of extending U. S. purchases materializes. There is a surplus of hay and straw in Canada, he says, and a need in the U. S. Why not make a trade? He is taking up an extensive newspaper advertising campaign in areas where there is feed available.

Born to Mr. and Mrs. Carl Wilde on Friday, Nov. 30th, a baby girl. Mother and babe are doing fine.

The window in the Cash Meat Market was broken Wednesday, when a couple of little girls playing tag, bumped into it. The butcher shop is plenty airy right now.

14 villages were razed and more than 100 people killed when severe earthquakes rocked the Kurdistan district of Turkey. Shocks were continuing giving rise to fears of further death and damage.

Board Of Trade Meet Monday

Dr. Stewart of Lethbridge, will be here Monday night, December 3rd, to speak at the Board of Trade Meeting, a good attendance is requested.

Ladies Literary Meet

The Ladies Literary Society met Wednesday at the home of Mrs. Ray Knight, Pres. Vio Snow presiding, members answered to roll call by repeating proverbs. An outline of the coming years study was presented by Chairman of Book committee Helen Orgill. A continuation of the art, literature, music and customs of the countries is the plan. Yugo Slavia, France, Italy, Germany and Austria are the subjects of the coming year. Mrs. Orgill also announced that the roll call would be answered by what each member considered the most interesting or significant current event of the month.

A short sketch of the Life of Maud Diver was given by Mrs. Norma Wood. This was followed by the Book Review "The Singer Passes" by Mrs. Valerie Allen. The book presents an interesting picture of India and Complete the study of that country. Invited guests were Mesdames C. D. Compton, Lee Brewerton, Bruce Vance and Arlo Palmer and the Misses Sara King and Iris Jones.

Lunch was served by hostesses Mrs. John Allen and Mrs. Knight.

TOWN ELECTIONS ARE APPROACHING

It will not be many weeks until notice will be given of nominations for Mayor, Town Councilmen, and School Trustees. We probably say too much about these matters, but each year we have seen a last minute rush to get nominees enough to fill

the vacancies. Election day has passed with only a small fraction of eligible voters, expressing a choice, and then we spend the other fifty weeks of the year bawling our heads off about the way things are run at the Town Office.

Personally, there is no room for pity or remorse on the part of the electors when conditions are not satisfactory to them. If we have a one man government as some claim we have, it is our own fault. If our civic officials are not giving the service they should, we are to blame, because we have the power within our hands to remedy it. But we are all a bunch of "Let George do it," people, who like to sit in the sideline and growl and complain, and "sue" somebody else on, but we are afraid of soiling

our own good name, or of giving offence if we come out in to the open and make our ideas known to the world.

There is good material in our town for public officials, but we usually leave it too late to get these men lined up. Probably we are so well acquainted that we let our personal likes and dislikes overshadow the capabilities of men for public office. If this is the case, we should hang our heads in shame. A man's virtues and sober-mindedness should be the things that decide either for or against him, and not our personal likes and dislikes, because he may not please us as a neighbor. Then too, many of us have axes to grind, and we want men on the Council who will turn the grindstone for us. This is a small view to

take of civic matter. We want a progressive, wide awake and up and coming town. To get this we want men and women in our civic bodies who have vision enough to see and act in the best interest of the town, whether they get gravelled walks and roads from their door step or not.

We haven't a thing in the world against any of our present officials. We could vote for another term for all of them. But, we think some of them merit a rest, and we believe it the duty of the taxpayers to get busy and line up men and women for Council and School Board, far enough in advance, that they can give the electors an idea of what they intend to work for. We get tired of hearing so much kicking and growling up an down the street, and would like to see this element get some candidates lined up and give the people a chance to support them, instead of hid'ing until the selections are made, and pouring forth their wrath on all and sundry who fail to measure up to their ideas of justice and fair dealing.

Think it over, and if you really think things are so very bad get busy and make them better, get busy and make them right.

APPRECIATION

We desire to express our appreciation to all who assisted, in giving, work, or buying, to make our Saturday Apron and Pantry Sale such a decided success.

BANK OF MONTREAL

Established 1817

A presentation, in easily understandable form,
of the Bank's

ANNUAL STATEMENT

31st October, 1934

LIABILITIES

LIABILITIES TO THE PUBLIC

Deposits	\$630,218,835.10
Payable on demand and after notice.	
Notes of the Bank in Circulation	35,255,876.00
Payable on demand.	
Bills Payable	185,183.19
Time drafts issued and outstanding.	
Letters of Credit Outstanding	6,522,749.56
Financial responsibilities undertaken on behalf of customers (see offsetting amount (x) in "Resources").	
Other Liabilities to the Public	10,386,724.55
Items which do not come under the foregoing headings, including \$9,000,000 advances from the Dominion Government under The Finance Act.	
Total Liabilities to the Public	\$682,569,368.40

LIABILITIES TO THE SHAREHOLDERS

Capital, Surplus and Undivided Profits and Reserves for Dividends	76,538,810.08
This amount represents the shareholders' interest in the Bank, over which liabilities to the public take precedence.	
Total Liabilities	\$759,108,178.48

RESOURCES

To meet the foregoing Liabilities the Bank has

Cash in its Vaults and in the Central Gold Reserves	\$ 87,210,888.26
Notes of and Cheques on Other Banks	28,670,917.74
Payable in cash on presentation.	
Money on Deposit with Other Banks	16,764,669.62
Available on demand or at short notice.	
Government and Other Bonds and Debentures	317,936,912.23
Not exceeding market value. The greater portion consists of gilt-edge securities which mature at early dates.	
Stocks	103,789.95
Railway and Industrial and other stocks. Not exceeding market value.	
Call Loans outside of Canada	32,133,844.20
Secured by bonds, stocks and other negotiable securities of greater value than the loans and representing money quickly available with no disturbing effect on conditions in Canada.	
Call Loans in Canada	8,399,657.67
Payable on demand and secured by bonds and stocks of greater value than the loans.	
Bankers' Acceptances	26,528.08
Prime drafts accepted by other banks.	
TOTAL OF QUICKLY AVAILABLE RESOURCES	\$491,247,207.75
(equal to 71.97% of all Liabilities to the Public)	
Other Loans	243,477,041.21
To manufacturers, farmers, merchants and others, on conditions consistent with sound banking.	
Bank Premises	14,500,000.00
Three properties only are carried in the names of holding companies; the stock and bonds of these companies are entirely owned by the Bank and appear on the books at \$1.00 in each case. All other of the Bank's premises, the value of which largely exceeds \$14,500,000, appear under this heading.	
Real Estate, and Mortgages on Real Estate Sold by the Bank	1,487,975.10
Acquired in the course of the Bank's business and in process of being realized upon.	
Customers' Liability under Letters of Credit	6,522,749.56
Represent liabilities of customers on account of Letters of Credit issued by the Bank for their account.	
Other Assets not included in the foregoing	1,873,204.86
Making Total Assets of	\$759,108,178.48
to meet payment of Liabilities to the Public of	682,569,368.40
leaving an excess of Assets over Liabilities to the Public of	\$ 76,538,810.08

PROFIT and LOSS ACCOUNT

Profits for the year ended 31st October, 1934, after making appropriations to Contingent Reserve Fund, out of which Fund full provision for Bad and Doubtful Debts has been made	\$4,105,024.34
Less Dominion and Provincial Government Taxes	900,654.83
	\$3,204,369.51
Dividends paid or payable to Shareholders	\$2,880,000.00
Reservation for Bank Premises	100,000.00
	\$2,980,000.00
Balance of Profit and Loss Account, 31st October, 1933	\$ 224,369.51
Balance of Profit and Loss carried forward	1,585,451.28
	\$1,809,820.79

WEEKLY LETTER

HOW TO MAKE

AN ICE WELL

Time for storing ice is approaching and something about of building a well will be of interest to many farmers who are anxious to put in a supply of ice for use next summer. The well is formed during freezing weather in the winter and during the summer the space in the pit above the ice is used for cooling purposes. The moisture content of the air in the well is very high but nearly all products requiring refrigeration may be kept for a reasonable length of time. Only a few products subject to the effects of air cannot be kept for long.

Ice at this station is stored in a well house with a built in cooling room and the ice well is not used. Material for this letter therefore, has been taken from other sources including pamphlet No. 2, New Series, issued by the Department of Agriculture at Ottawa, and an article on ice-wells from the North Dakota Experiment Station, published in a recent issue of the Montana Farmer.

Either a square or round pit may be used though a square one is easier to build. Dimensions recommended for the latter type are 8 feet square and 8 feet deep. A depth of six feet of ice in a pit of this size will last about five months in a properly constructed well. In light porous soils that are well drained and free from ground water, the water from the melting ice will drain away. In heavy soils the well needs to be dug in the bottom and filled with gravel or sand. In very heavy soils a sump hole may be needed so the water from the melting ice may be pumped out. This is very important because the ice melts very quickly if water is allowed to collect in the pit.

The well needs to be lined or cribbed, otherwise the action of the ice and moisture will cause the dirt to cave in and ruin the ice. Cheap lumber is used for this purpose though the lining needs to be reasonably tight to prevent water placed for freezing from escaping.

A small shed is built over the

well to protect the ice from summer rains and keep as much heat as possible from entering the pit. A tight fitting floor is an important feature of the shed. This may be built of two layers of planking with three ply paper in between. By building in sections the floor is easily removed for freezing reason the windows, door and even the roof are removable so that it can be opened early in the winter and kept open when being filled in order to get full benefit of the outside temperature.

The well is filled during cold weather by running one or two inches of pure cold water into the pit at a time, allowing it to freeze solid before adding more, until the ice block reaches the desired height, when the well is covered tightly and left until needed. A two-foot space is left at the top of the pit for storing products. A snugly fitting trap door is built in the center of the floor and a wooden rack or basket suspended from a pulley is helpful in lowering and raising cans of milk and other products stored in the well.

STEADY PROGRESS

During the last year or more no publication has shown more remarkable strides in the matter of increased circulation than the Family Herald and Weekly Star. This is not strange for it is evident that in times of stress people are prone to cut down on the number and variety of magazines and papers coming into their home and they find in the Family Herald and Weekly Star a paper which, at \$1.00 per year, gives them every variety of reading, for old and young, all combined in this one publication. Every issue overflows with practical farming ideas, up-to-the minute articles, short stories, together with a weekly newspaper section which rounds out a feast of reading without compare. Truly it has been well said that the Family Herald Star is the best for the least.

No fewer than 19,773,591 fruit and vegetable packages came under the inspection of the Dominion Fruit Branch for grading and marking during the year ended March 1934. In addition, 1,151 inspections were made under the Standard Package Regulations; 59,388 inspections of fruits and vegetables and containers; 20,402 commercial inspections for export and 17,631 for domestic shipments.

Hay, Straw or Other Fodder

WANTED

Will be purchasing fodders of all descriptions until June 1, 1935, for export. Any fodders purchased by me must be of average quality and of feeding value. My purchases are for the account of the Federal Emergency Relief Administration of the U.S.A. Funds for these purchases are guaranteed by the Canadian Bank of Commerce, Brandon, Man.

Correspondence properly attended to, and if samples are forwarded, prices will be given by return mail.

Hay presses, Hammer Mills and Cutting Boxes can be placed for full winter's work.

Sheriff Malcom Mc Gregor
Court House, Brandon, Man.

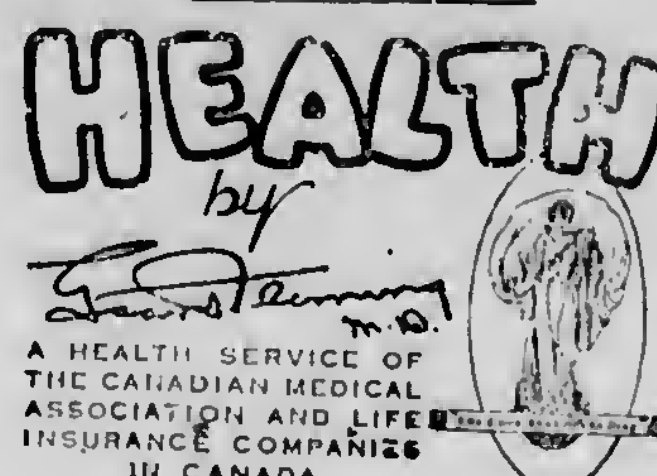

COD LIVER OIL AND CATTIE

Cod liver oil has never attracted very great prominence in supplementing the rations of the larger farm animals because the nutrients which it can supply, or help to make available, can be procured almost equally well, and much more cheaply, from the ordinary farm live stock feeds, plus a minimum of purchased supplements such as protein feeds and minerals.

There are some occasions, however, when cod liver oil constitutes a valuable feed for the larger farm animals. Pigs being grown during the winter months sometimes develop an unthrifty rachitic condition, resulting from an evident deficiency of some of the vital feed elements. Such animals can often be brought into better condition by feeding cod liver oil. If trouble is anticipated, small doses of the oil will probably correct any tendency to a rachitic condition.—Fish Meals and Oils Bulletin, Dominion Department of Agriculture.

"Lady for a Day" lived up to all advance notices and was a picture that one could enjoy from start to finish. A large crowd was on hand Monday night as it was also Dinnerware night.

NATURAL REMEDIES

Look around you and think, for a few minutes, about those things which are used in their natural state. The chair on which you sit and the table from which you eat are made from wood, a natural product, but they have been fashioned by man into something that is better adapted for man's use.

The electric current, which serves so many purposes, comes indirectly from coal taken out of the ground, or from power generated by water-falls. Man has found electricity to be more useful in some ways than the coal itself or the old water wheel. We could go on and on to show how man, by using his intelligence, has been able to take the products of mother earth and from them, to fashion many things for his use and comfort.

Why is it then that there lurks in the minds of many people a faith in what they call "natural remedies" as distinct from those which are prepared by man? Why is it that many believe that primitive peoples know so much about the curing of diseases by the means of plants and herbs? Have these same primitive peoples given us anything in the field of science to suggest that they are likely to be learned in the science of pharmacology?

When the old-time medicine man toured the country, he usually carried with him some remedy which supposedly had come to him in some mysterious way, through the Indians, or from some far-away land. Often this concoction was called a "tonic" or a "blood-purifier." These were the days when blood was described as being "thin" or "bad," when spring tonics and the cleansing of the blood were accepted as necessary, if unpleasant, adjuncts to the awakening of nature after the cold winter season. Strange to say, these remedies were supposed to come from peoples or countries which were not notoriously healthy.

There is nothing wrong with plants and herbs; indeed, there is much good in them. Nevertheless, there is no inherent magic curative power in the products of the earth. In this, as in other fields, man has learned to take these products and to improve them in various ways in order that some of them might be used effectively in the treatment of disease. Nor is man limited to plants and herbs in the preparation of healing substances. There is no remedy growing out of the earth for diphtheria or diabetes, but man has produced antitoxin and insulin for their treatment. We progress through the use of our intelligence, not by looking to the ignorant for help.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

The work of the Dominion Division of Forage Plants which is carried on at the different Dominion Experimental Farms and Stations in Canada is concerned not only with herbage plants, which include the various annual and perennial hay and pasture plants, but also with several crops which are grown primarily for feeding purposes, such as corn, sunflowers, and field roots. Experiments with turf grasses are also part of the work of the Division, as well as certain special crops, the most important of which are soybeans and sugar beets.

It's so convenient to keep a package of Kellogg's All-Bran in the kitchen. Serve it as a cereal. Use it also as a healthful ingredient in your cooking. For muffins, breads, waffles, etc.

All-Bran brings your family the "bulk" that is so helpful in correcting common constipation.

Two tablespoons daily are usually sufficient. In severe cases, with each meal. How much better than risking potent medicines!

Laboratory tests show Kellogg's All-Bran supplies "bulk" and vitamin B to aid regular habits. This "bulk" is similar to that in leafy vegetables. All-Bran is also rich in iron for the blood.

Special processes of cooking and flavoring make Kellogg's All-Bran finer, softer, more palatable than ordinary raw bran.

And because it is all bran—with only flavoring added—it brings you more "bulk" than part-bran products.

Get the red-and-green package at your grocer's. Made by Kellogg in London, Ontario.
